

# HINDS-BOCK 6P-04 FILLER FOR TRAY LINE AND HORIZONTAL VACUUM FORMER APPLICATIONS

- ❑ **Servo motor** moves the entire filler for spreading product during the fill cycle or to shift the filler for filling into multiple targets.
- ❑ **Positive shut-off spouts** with an adjustable blow-off feature are used to maintain a clean fill zone.
- ❑ **A tool free tilt hopper** and spout plate along with two-piece strong back makes for disassembly in under a minute without tools.
- ❑ **No flex product hoses** are used to improve weight accuracy and to reduce clean-up time.

TILT HOPPER MAKES SANITIZING EASY
