

HINDS-BOCK SERVO DRIVEN ICING DEPOSITOR

The Servo Driven Icing Depositor is ideal for Accurate Spreading of:

- ❑ **Icings**
- ❑ **Creams**
- ❑ **Custards**
- ❑ **Fruit Fillings**
- ❑ **Mousse**

Tool free tilting of hopper and spout plate for quick and easy disassembly.

The entire depositor drives for bottom-up depositing via servo motor. Metering pistons are driven by a servo motor to tune the spreading of product to minimize or eliminate down stream hand dressing. Operator interface/PLC control are recipe driven for easy setup.
