

# HINDS-BOCK HYDRAULIC PUMPS

## INTRODUCING OUR NEWLY DESIGNED TWIN PISTON PUMP

The P-330HT joins our line of piston transfer pumps that move hot or cold, flowable liquid products from mixing, holding or cooking vessels to filling machines. All Hinds-Bock transfer pumps provide gentle handling of products with particulates. The P-330HT transfers your deli salads, chunky stews, cottage cheese, soups, fruit fillings at speeds up to 65 gallons per minute. The P-330HT can benefit your production line by:

- PROTECTING THE QUALITY OF YOUR PRODUCT with its damage-free handling
- INCREASING PRODUCTION CAPABILITY
- ASSURING A LOW-MAINTENANCE ENVIRONMENT with its ease of clean-up and operation

### Features of the P-330HT Twin Piston Hydraulic Transfer Pump

- 4" diameter ports for gentle, free passage of large particulates
- High speed—up to 65 gallons per minute
- Synchronized dual pistons assure continuous flow
- Easy and quick, tool-free disassembly for sanitizing
- Stainless steel construction
- PLC control
- Simple speed controls
- Level probe option
- Hydraulic power pack available
